PROJECTS

Traffic LIGHT Management System

Traffic Light Management System Built an interactive traffic signal simulation using HTML, CSS, and JavaScript to demonstrate real-time light changes and control logic.

INTERACTIVE MULTI-PAGE WEBSITE

Interactive Multi-Page Website Built a responsive multi-page website with navigation menu, image display, and interactive buttons using HTML, CSS, and JavaScript.

INTERACTIVE PORTFOLIO WEBSITE

Interactive Portfolio Website (HTML, CSS, JavaScript) Built a responsive, animated single-page portfolio with dark/light theme, modal project details, filters, and mobile navigation.

AI IMAGE GENERATOR

The AI Image Generator & Cloud Storage is a full-stack web application built using MERN Stack (MongoDB, Express.js, React.js, Node.js). It enables users to generate AI-based images from text prompts and store them securely in the cloud using ImagePig. This project demonstrates advanced full-stack development skills, AI integration, and secure cloud-based file handling.
